Uploading to the **Accu-Chek® Connect** online diabetes management system

**Use these instructions to upload data in your office for patients who do not have an Accu-Chek Connect Online account.**

**Note:** You must have Accu-Chek Connect Device Link software installed and one of the following three cables:
- Accu-Chek 360° USB cable
- Accu-Chek IR cable
- Accu-Chek Smart Pix device reader (Windows only)

If you have questions, see the Accu-Chek Connect Online Setup and Daily Use Guides for additional information.

---

**Step 1**

See instructions below for how to put each Accu-Chek meter into download mode.

- **Start with device:**
  - **1. Accu-Chek Aviva Connect meter**
    - Select **My Data, Data Transfer**, then select **USB cable**
  - **2. Accu-Chek Aviva Expert meter**
    - From the main menu, select **My Data**, then select **Data Transfer**
  - **3. Accu-Chek Aviva Combo meter**
    - From the main menu, select **My Data**, then select **Data Transfer**
  - **4. Accu-Chek Spirit Combo insulin pump**
    - With pump in **STOP** mode, press the 4 times to move to the **Data Transfer screen.** Press twice to start.
  - **5. Accu-Chek Aviva meter**
  - **6. Accu-Chek Nano meter**
  - **7. Accu-Chek Compact Plus meter**

---

**Step 2**

Start with device:

- **ON**
- **OFF**

**Step 3**

Follow on-screen instructions for each meter using device link.

**Setup Device**

Login device to your ACCU-CHEK Connect online account

- **Username:** [Enter Username]
- **Password:** [Enter Password]
- **Remember Me**

**Note:** For Healthcare Professionals only.

- **Create an account**

---

**Devices downloaded via infrared (IR) cable**

- **Plug USB cable into device and computer; do not move device or cable during communication**
- **Place device on a flat surface with IR port within 4” from the infrared cable**
Mapping patient data to the Accu-Chek Connect online portal

1. Go to Patients menu in Portal.
2. Click Data Sharing Requests.
3. Select a new invitation or a new device.
4. Find corresponding patient in Existing Patients list. Click patient name to highlight it.
   - If patient name is not found under Existing Patients, click Add Patient.
   - After entering the information, click Add Patient.
5. Map patient data by clicking the Link button.
